

Takudzwa R. Mambwere

PERSONAL STATEMENT

Computer science is my degree course of first choice. It has many specialisations and it is growing and evolving at a very high rate. Computers are indispensable and influential tools in our present lives and in the future. They help all kinds of businesses with analysing data and decision making for machines and humans. My desire is to be part of this information technology evolution with a special focus on Software Engineering. I am positive that Sapienza university will afford me the opportunity to study this program, a subject which has been of huge fascination and interest in my high school years.
